

CURRICULUM VITAE
Leslie Anne Bruggeman

Address:

Rammelkamp Center for Education and Research
MetroHealth Medical Center
2500 MetroHealth Drive R429
Cleveland, OH 44109
(216)778-7603
(216)778-4321 fax
email: leslie.bruggeman@case.edu

Education and Training

- 1979-83: B.S. in Chemistry & Biology, Bowling Green State University, Bowling Green, OH.
- 1983-87: Ph.D. in Biochemistry, West Virginia University, Morgantown, WV.
Mentor: Kevin L. Dreher, Ph.D.
- 1988-91: Post Doctoral Fellowship, Laboratory of Developmental Biology and Anomalies,
National Institute of Dental Research, National Institutes of Health, Bethesda, MD.
Mentors: George R. Martin, Ph.D. and Yoshihiko Yamada, Ph.D.

Professional Experience

- 1991-93: Staff Fellow
Laboratory of Developmental Biology, Chief: Kenneth Yamada, M.D.
National Institute of Dental Research, National Institutes of Health, Bethesda, MD.
- 1993-94: Senior Staff Fellow
Laboratory of Oral Medicine, Chief: Abner L. Notkins, M.D.
National Institute of Dental Research, National Institutes of Health, Bethesda, MD.
- 1994-01: Assistant Professor of Medicine
Division of Nephrology, Mount Sinai School of Medicine, New York, NY.

Director, Transgenic Animal Program, Division of Nephrology
- 2001-pres: Associate Professor of Medicine
Rammelkamp Center for Education and Research, MetroHealth Medical Center

Associate Professor
Department of Medicine, Case Western Reserve University, Cleveland, OH

Research Interests

Transcriptional regulation of viral and eukaryotic promoters
Transcription factor dysregulation in renal disease pathogenesis
Host pathogenesis in HIV-associated nephropathy

Bibliography

Peer Reviewed Manuscripts:

1. Dreher, K. L., V. Asundi, B. Wolf, and L. Bruggeman. Rabbit immunoglobulin κ 1b6 gene structure. *J. Immunol.* 145, 325-330 (1990).
2. Bruggeman, L. A., H.-Y. Xie, K. S. Brown, and Y. Yamada. Developmental regulation of collagen II gene expression in transgenic mice. *Teratology* 44, 203-208 (1991).
3. Bruggeman, L. A., S. Horikoshi, P. D. Burbelo, Y. Yamada, and P. E. Klotman. Mechanisms of type IV collagen gene regulation. *Am. J. Kidney Dis.* 18, 134-139 (1991).
4. Bruggeman, L. A., E. A. Horigan, S. Horikoshi, P. E. Ray, and P. E. Klotman. Thromboxane stimulates synthesis of extracellular matrix proteins in vitro. *Am. J. Physiol.* 261, F488-F494 (1991).
5. Burbelo, P. D., L. A. Bruggeman, G. D. Gabriel, P. E. Klotman, and Y. Yamada. Characterization of a *cis*-acting element required for efficient transcriptional activation of the collagen IV enhancer. *J. Biol. Chem.* 266, 22297-22302 (1991).
6. Kopp, J. B., M. E. Klotman, S. H. Adler, L. A. Bruggeman, P. Dickie, N. J. Marinos, M. Eckhaus, J. L. Bryant, A. L. Notkins, and P. E. Klotman. Progressive glomerulosclerosis and enhanced renal accumulation of basement membrane components in mice transgenic for HIV-1 genes. *Proc. Natl. Acad. Sci. (USA)* 89, 1577-1582 (1992).
7. Bruggeman, L. A., P. D. Burbelo, Y. Yamada, and P. E. Klotman. A novel sequence in the type IV collagen promoter binds nuclear proteins from Engelbreth-Holm-Swarm tumor. *Oncogene* 7, 1497-1502 (1992).
8. Horikoshi, S., K. Fukuda, P. E. Ray, M. Sawada, L. A. Bruggeman, and P. E. Klotman. A PCR method for the quantitative assessment of mRNA for laminin A, B1 and B2 chains. *Kidney Int.* 42, 764-769 (1992).
9. O'Reilly, M. A., A. G. Geiser, S.-J. Kim, L. A. Bruggeman, A.-X. Luu, A. B. Roberts, and M. B. Sporn. Identification of an activating transcription factor (ATF) binding site in the human transforming growth factor- β 2 promoter. *J. Biol. Chem.* 267, 19938-19943 (1992).
10. Bruggeman, L. A., J. A. Pellicoro, E. A. Horigan, and P. E. Klotman. Thromboxane and prostacyclin differentially regulate murine extracellular matrix gene expression. *Kidney Int.* 43, 1219-1225 (1993).
11. Ray, P. E., L. A. Bruggeman, S. Horikoshi, G. Aguilera, and P. E. Klotman. Angiotensin II stimulates human fetal mesangial cell proliferation and fibronectin biosynthesis by binding to AT1 receptors. *Kidney Int.* 45, 177-184 (1994).
